

Math 848 2020 Midterm Prep

- **Please read this and send me an email with Subject line “Math 848 Midterm Preparation” by 9am on Friday saying that you understand it. If you have any questions or concerns about the test please raise them by this time.**
- I will post the real test online at 3pm on Monday, May 11. You will have until 3pm Tuesday to get it back to me. You may bring it to me in room 305 of building 209; or email it to me as you have been doing with the homework. Try to take extra care to make nice scans/photos for e-mailed submissions. And write clearly – I tend to be more generous with marks if it is clear, organised, and easy to read.
- The test should take about an hour.
- Read the instructions on the test carefully, you do not need to do all questions.
- Please do the questions on your own. Do not discuss them with other students.
- Several questions are from the notes. To prepare for the test, review the notes and your answers to problems in the notes.
- On one question, you will have the option to write a python program. If you think you might want to do this, be sure you have looked at the instructions for the programming assignment so that you know the acceptable formats for doing so.
